Irwin Law - Essentials in Canadian Law Series

Containing over [300 books](#), this e-collection analyses the complex issues in a succinct and readable style, and in a manner that is probing and thoughtful. With a focus on Canadian law as well as some international topics, the Irwin Law collection covers a wide range of practice areas.

Vincent AI – reputable AI tool using Canadian cases

[vLex's powerful AI tool: Vincent](#), is the first search and discovery aid of its kind to connect with one of the world's largest legal databases – reducing risk, saving time and improving results using Canadian case law. Reputable AI for your use.

Vincent's **intuitive drag-and-drop interface** enables you to upload a relevant document, whether it's a case, a skeleton argument, etc. You can also type or copy and paste relevant information into the text box as a starting point. Vincent will review your document and return a unique set of highly relevant search results in a matter of seconds, which would have taken hours to compile.

vLex has enhanced Vincent AI's capabilities to include a new feature called **Case Analysis**. Vincent, using large-scale language models, can now read cases, extract key information, and automatically produce summarised headnotes - helping legal professionals understand the important issues addressed in a judgment at a glance. [Vincent AI User Guide](#)

- ❖ Available as part of [e-LiRN suite of resources in all Ontario courthouses](#).
- ❖ [Remote Access to vlex for lawyers who practice in Northern Ontario](#).
- ❖ Training for lawyers is eligible for CPD - Professionalism accreditation
